
Job Description

Job Status: Permanent / Full-time
Title: ASP.NET Developer
Reports to: Director of Application Development
Location: Neptune, NJ

Position Overview: Growing, dynamic company based in Monmouth County New Jersey is seeking a creative developer with ability to create and maintain great Internet and Intranet websites and applications in a variety of browsers to deliver products and excellent service to our clients. You will have solid experience in delivery of web application projects working in accordance with defined project framework and procedures. The role will involve all aspects of the software lifecycle from specification, design and development through to implementation of Internet and Intranet websites. This is a challenging role involving producing work of high standard with a huge emphasis on attention to detail. This is a great opportunity for the individual looking for an environment which is varied and challenging, and also offers career progression for those with the right potential.

Desired Skills & Experience:

- Strong experience with C#, ASP.NET, HTML5, CSS, AJAX, JavaScript, Web Services, IIS
- Experience developing large enterprise applications utilizing ASP.NET
- Excellent understanding of Object-Oriented Programming and the Microsoft .NET Framework
- Ability to analyze, design, and implement components by applying best practices and coding standards.
- Solid understanding of MS SQL/Server database and SQL language.
- Solid grasp of design patterns and refactoring
- Ability to gather and analyze business requirements to recommend optimal technical solutions
- Capable of being a cross functional team member as well as having the ability to work independently
- Experience with Agile development and Team Foundation Server is preferred
- Telecom industry experience is preferred, experience with Telerik and/or Infragistics controls is a plus

Required Qualifications & Education

- Bachelor's degree in Computer Science or Information Systems
- A minimum of 4 years of hands-on experience with Development involving Microsoft.NET and SQL Server.
- Ability to support and maintain existing systems that use a variety of .NET technologies.
