DESCRIPTION OF INSIDE WIRING MAINTENANCE PLAN:

The Inside Wiring Maintenance plan is an optional plan that provides diagnosis and repair of inside wiring for a monthly fee. Under this plan, we will repair or replace the defective standard inside wiring at no cost to you. Inside wiring is defined as wiring from the local telephone company demarcation point to the telephone jack at the customer premises. Unless specified otherwise, the term “Inside Wire” or “Inside Wiring” when used in these Terms and Conditions, shall include inside telephone wire and jacks.

Surface mounting is the standard for replaced wiring and jacks. Requests for replacement of concealed wire requiring extra work will be subject to time and material charges. Trouble isolation can often be accomplished through office testing facilities. We reserve the right to dispatch at our discretion to isolate service problems.

To request maintenance service you should call **Spectrotel Customer Care at 1-888-773-9722.**

The following services are INCLUDED in the Inside Wiring Maintenance Plan:
