

Be Confident in Your Cloud PBX Solution

When deciding which Cloud PBX solution to procure to enable your office communications, the most important feature to look for is confidence. Spectrotel is dedicated to providing customized solutions backed by deep knowledge, expertise, and execution so you can be confident that your solution gives you and your users a best-in-class experience throughout their entire lifecycle.

Spectrotel delivers a truly customizable Cloud PBX solution, technical resources, and hands-on support that simplifies the design and procurement process. You'll be delighted at how smooth the transition to new technology can be when the professionals at Spectrotel help guide and support the sales, implementation, training, and support of your new Cloud PBX solution, and how seamlessly it integrates into your business.

Why Spectrotel

CUSTOMIZED SOLUTIONS

Three platforms are at the core of our Cloud PBX solution combined with access options, giving you a perfectly tailored solution with the best-fit technology, all through one provider.

KNOWLEDGE AND EXPERIENCE

Spectrotel combines over 20 years of experience aggregating and integrating telecom services with a team of knowledgeable engineers to put a powerful and reliable problem-solving force at your fingertips.

SUPPORT SIMPLIFIED

We take full ownership of the design, implementation, and ongoing support of every Cloud PBX Solution. We don't just dropship phones or point fingers. Just hands-on, helpful support.

No Two Applications are the Same

Yet all that the vast majority of Cloud PBX and UCaaS providers offer is a one-size-fits-all solution. Spectrotel has three different Cloud PBX platforms we can leverage and an entire connectivity solution portfolio, which allows us to customize a solution based on the unique needs of every customer application, like:

- Features and functionality
- Usage and budget
- Current or new equipment requirements
- Available API integrations
- Managed or unmanaged
- Network architecture, performance, and optimization
- Security

Here's Why Our Customers Prefer Spectrotel Cloud PBX:

Consultative Approach

Leads to more value and better outcomes.

Technology Options

Three platforms available give you more choices.

Proven Process

Presales discovery uncovers business needs.

Fast, and Efficient Installation

Thanks to better qualification and custom design.

Hands-On Help

Fully managed project and implementation process.

One Call to Make

No finger pointing. We take ownership of trouble resolution from end-to-end network and service.
