

ASP.NET Software Developer Intern

Growing, dynamic company based in Monmouth County New Jersey is seeking an enthusiastic techie with some programming experience, to learn new skills while working with our development team, building our future business systems.

Candidates will need to have some experience in writing programs in an Object-Oriented language (C#, Java, JavaScript) and retrieving data using SQL. The role will involve testing system changes, documenting results and reporting the findings to your team, to prevent buggy software from being released into production.

This role involves working with senior developers to learn, test and document key systems.

This is a great opportunity for a techie that wants to learn more about programming and offers career progression for those with the right potential.

Requirements

- Some experience with an Object-Oriented Programming language (C#, Java, JavaScript).
- Basic understanding of relational databases, SQL language and scripts.
- Good analytical and problem-solving abilities.
- Clear verbal and written communication skills.
- The ability to read existing code and understand what it's doing.
- The ability to test code based on user requirements and document findings.
- The ability to write end-user documentation.
