SPECTROTEL

Solutions delivered seamlessly anywhere, anytime

SIP Analog, Trunking, PRI Solutions

Flexible, Scalable, Reliable Communications

Our selection of powerful SIP communications platforms delivers secure, reliable, and flexible voice services and voice connectivity over an all-IP network to any technology or equipment. Along with the benefits of moving to SIP, our feature set will take your communications to the next level.

Deploy quicker   **Manage Costs**   **Maximize uptime**   **Scale on demand**

The Power of Spectrotel One

As a next generation aggregator, Spectrotel makes it simple to modernize your enterprise with multiple phase solutions for transition and optimization. Let us help you optimize your voice communications from the past to the future with economical, efficient and resilient solutions.

The Spectrotel Advantage

We provide an easy and fast migration to your new solution

Connect to any technology or equipment

Protect investments and leverage equipment and infrastructure. With certifications for top vendors, and deployment expertise, we seamlessly deliver SIP to any technology or equipment.

Choose your connection and self-manage

We make it easy to connect to our services whether on-premise or cloud-based. Need the ability to make changes on demand? Our self-service portal puts service management at your fingertips.

Peace of mind with reliability and security

Ensure business continuity with redundant trunks and geographic routing capabilities. Our TLS/SRTP encryption keeps your network and data safe and sound.

Product Overview

Our SIP products provide a full suite of advanced communications features and capabilities which include DIDs, additional trunks, direct trunk overflow, call forwarding, call waiting, calling line ID, name delivery, name retrieval, remote call forwarding, toll free, E911, international calling, unlimited plans, directory listings, number porting, equipment, installation, and more.

- Quick deployments
- Little to no incremental infrastructure investment
- Uses a direct internet connection to a SIP ATA, SIP gateway or SIP-ready PBX
- On-demand capacity with flexible bundling options
- Disaster avoidance and failover planning
- Service quality and maximized uptime
- Transport Layer Security (TLS) and Secure Real-time Transport Protocol (SRTP) encryption
- Microsoft Teams Direct Routing integration enables calling via SIP trunks
- End-to-end QoS can be established through a private direct connection

Key Benefits

| Flexible capacity
- Traditional PRI has fixed increments when purchasing additional channels
- SIP enables you to order in any increment
- Scale capacity as needed and pay only for the services required

| Trunk consolidation
- Consolidate locations on a shared infrastructure
- Boost interconnectivity between multiple sites

| Cloud-based savings
- Realize significant cost savings since less infrastructure is required
- Reduce infrastructure costs from a premises-based to a hybrid or cloud solution

| Speed-to-market
- Traditional PRIs can take 30 days or more to order and install
- SIP has an incredible speed to market and can be implemented in days
- Customers can quickly increase capacity whenever its needed

Modernize the Enterprise

Spectrotel's cloud communications solutions help you modernize your network, monetize your technology investment, and amortize your costs as operating expenses – all under one umbrella. You'll get 24/7/365 white-glove support for your human-crafted cloud communications solutions.
