2.7 Allowances for Interruptions in Service

Interruptions in service, which are not due to the negligence of, or noncompliance with the provisions of this tariff by the Customer, or the operation or malfunction of the facilities, power or equipment provided by the Customer, will be credited to the Customer as set forth below for the part of the service that the interruption affects. A credit allowance will be made when an interruption occurs because of a failure of any component furnished by the Company under this tariff.

2.7.1 Credit for Interruptions

- A. An interruption period begins when the Customer reports a service, facility, or circuit to be interrupted and releases it for testing and repair. An interruption period ends when the service, facility, or circuit is operative. If the Customer reports a service, facility, or circuit to be inoperative but declines to release it for testing and repair, it is considered to be impaired, but not interrupted.
- B. For the purpose of applying this provision, the word "interruption" shall mean the inability to complete calls, either incoming or outgoing or both, due to equipment malfunction or human errors. "Interruption" does not include and no allowance shall be given for service difficulties such as slow dial tone, circuits busy or other network and/or switching capacity shortages. Nor shall the interruption allowance apply where service is interrupted by the negligence or willful act of the subscriber or where the Company, pursuant to the terms of the tariff, suspends or terminates service because of nonpayment of bills due to the Company, unlawful or improper use of the facilities or service, or any other reason covered by the tariff. No allowances shall be made for interruptions due to electric power failure where, by the provisions of this tariff, the subscriber is responsible for providing electric power. Allowance for interruptions of message rate service will not affect the subscriber's local call allowance during a given billing period.
- C. For calculating credit allowances, every month is considered to have thirty (30) days. A credit allowance is applied on a pro rata basis against the rates specified hereunder and is dependent upon the length of the interruption. Only those facilities on the interrupted portion of the circuit will receive a credit.

2.7 Allowances for Interruptions in Service, (Cont'd.)

2.7.1 Credit for Interruptions

D. A credit allowance will be given, upon request of the Customer to the business office, for interruptions of at least 24 hours. Credit allowances will be calculated as follows:

- One-thirtieth of the tariff monthly rate of all services and facilities furnished by the company rendered inoperative, useless or substantially impaired for each of the first three full 24-hour periods during which the interruption continues after notice by the customer to the company if the out-of-service extends beyond a minimum of 24 hours.
- Two-thirtieths of the tariff monthly rate for each full 24-hour period beyond the first three 24-hour periods referred to in paragraph (1). However, in no instance shall the allowance for the out-of-service period exceed the total charges in a billing period for the service and facilities furnished by the company rendered useless or impaired.
- When service is interrupted for a period of at least 24 hours due to storms, fires, floods or other conditions beyond the control of the company, an allowance of 1/30 of the tariff monthly rate for all services and facilities furnished by the company rendered inoperative or substantially impaired shall apply for each full 24 hours during which the interruption continues after notice by the customer to the company.

Two (2) or more interruptions of fifteen (15) minutes or more during any one (1) twenty-four (24) hour period shall be considered as one (1) interruption.

- F. interruptions of service during any period when the Customer has released service to the Company for maintenance purposes or for implementation of a Customer order for a change in service arrangements; and

2.14.1 General

The Company may adjust its rates and charges or impose additional rates and charges on its Customers in order to recover amounts it is required or allowed by governmental or quasi-governmental authorities to collect from or pay to others in support of statutory or regulatory programs.

2.14.2 Public Pay Telephone Surcharge

An undiscountable per call charge is applicable to all interstate, intrastate and international calls that originate from any domestic pay telephone used to access the Company's services. The Public Pay Telephone Surcharge, which is in addition to usage charges, applicable service and surcharges associated with the Company's service as set forth herein, applies for the use of the instrument used to access the Company service and is unrelated to the Company's service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and other interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any re-originated call (i.e., using the "#" symbol).

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.
